

SABABA COMPLETE SOLUTION

Product Specification

We design and manufacture innovative and cost effective solutions to serve our clients (mainly the Retailers) and by doing so, positively contributing to their businesses. Our client relationships are built on trust and the fact that we understand their Point of Sale (POS) trading area requirements, including the equipment and processes supporting transacting, and elements affecting uptime and costs.

We provide innovative, durable and aesthetically pleasing products that are future upgradable, feature rich, customisable and with branding space.

The secure mounting of equipment and 100% protection of cables ensure trading uptime while minimising maintenance costs and the possibility to lose transactions.

The Cashier and the Client have convenient access to equipment, securely mounted, for ease of use and to complete transactions promptly.
